## 🪪 PROFILE

**6 years** of expertise in building software for various domains at scale, with a year involved in Technical Entrepreneurship. I have sound understanding of web-technologies.
Looking for opportunities as full-stack developer and challenging role, preferably in smaller team with large responsibilities.

## 🧠 SKILLS

JavaScript, ES6+, VueJS, NuxtJS, ReactJS, ReactNative, NodeJS, ExpressJS, Deno, TypeScript, HTML, CSS, TailwindCSS, SaSS, MongoDB, PostgreSQL, ElasticSearch, Redis, Kafka, WebSockets, Golang, Python, Firebase, RemoteConfigs, RTDB, Supabase

## 🎓 EDUCATION

**Bachelor of Engineering**
M S Ramaiah Institute of Technology
2014 – 2018 | Bangalore, India

***Delhi Public School***
2011 – 2013 | Bhilai, India

## 💼 PROFESSIONAL EXPERIENCE

**Founder - ProspectoAI, Quido, Twople**
Technical Entrepreneurship
2023 – present
- Harnessing my interest in Entrepreneurship, I started building my own company full time since January 2023.
- **Twople** was last functional with ~400 MAU and ~40 orders per month.
- With **ProspectoAI**, we automated many daily tasks around out-bound based sales, and campaigns. We integreted Ollama to enhance messages and contents.

**Quizizz** ⤢
Senior Software Engineer - FullStack
Feb 2022 – Feb 2023
- Established experimentation capabilities with the product pricing, which helped us take our annual plan from $60 to $144 with net increment in overall revenue from paid users.
- Split Quizizz app into micro-services for smooth scaling and development.
- Streamlined "Game-Settings" & "Reports" for uniformity in code, experimentations. Used SOLID principles to refactor.

**Quiph Media**
Senior Software Engineer - Web Lead
Feb 2021 – Feb 2022
- Responsible for web-app development while pivoting from Qtalk to SuperShare.
- Developed iOS app using ReactNative for SuperShare and ensured quality enhancement and feature addition to the SuperShare web app using NuxtJs framework
- Set up system to test crucial user-flows in an automated environment. The tests ran every hour or everyday based on their config.

**Quinbay Technologies**
Software Engineer
2018 – Jan 2021
- Designed and Developed BlibliPlay, a video-streaming service with live-streams, interactions and chat options from scratch
- Upgraded build tools, introduced Unit testing and established monitoring system.
- Organised various tech sessions, review sessions and training of new hires in JavaScript. Interviewed 20+ candidates for various senior positions.

## 🏠 ORGANIZATIONS

**Open Source Softwares - VueJS, VueCLI, NodeJS**
Contributor
Contributed in various NodeJS & VueJS project source-code including VueCLI Tool.
Successfully completed Hacktoberfest 2019, 2020 and 2021
